McKinsey outlines the case for functional leaders — which it lists as CFO, chief marketing officer, chief strategy officer, chief technology officer or general counsel — stepping into the CEO role as being strongest when that individual’s background and skill set can be applied to a significant organizational challenge. However unusual appointing a CTO to the CEO role might appear, McKinsey suggested that for an organization in need a major digital transformation, bringing on a technologist might make smart business sense. Likewise, companies in acquisition or growth mode might opt for a CFO to replace an outgoing CEO.
Imperative IT Experiences

• Strong Business Process background
• Technology Implementation experience
  – Solution Architecture, Business Architecture, ID Gaps, Communication, Managing Expectations
• Business Application experience
  – Sales & Marketing
  – Analytics
  – Operations
